Membership Poll

What do you think should replace the pool?

Check all that apply:

- Nothing else – it’s just fine as it is. I would oppose spending any further funds on the space.
- A new pool. With the right conditions and for the right price, I could support a new pool.
- Absolutely not a pool. I would oppose a new pool under any conditions.
- An expanded patio with planting areas, seating areas, lighting, and enhanced ambiance for our social events.
- A water feature other than a pool. For the right price, I could support an active water feature, operating only during events.
- A permanent outdoor serving area/bar. For the right price, I could support the addition of a permanent feature to replace our current “roll-away” bars for use at community events.
- You didn’t mention it, but I could support the addition of _____

What about the Community Center building?

- I agree that the former pump room should be renovated – at a reasonable price – adding approximately 100 square feet to the common area of the Community Center.
- Leave the former pump room as it is. I would oppose spending any funds to incorporate that space into the common area of the Community Center.

Do you want to tell us anything else? _____
